

Impingement is simply when the particle collides with the fibers of the filter and get stuck.

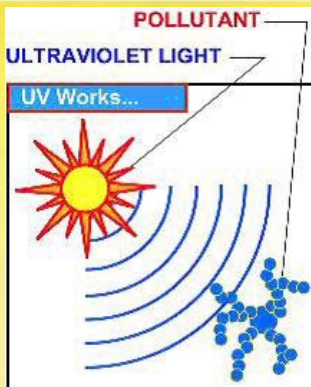

Polarization takes advantage of the natural charge of each particle like an electro-magnet. This greatly increases the efficiency of the filter.

Once the particle is captured, it attracts more and more particles like paper clips with a magnet.

Ultraviolet light is germicidal, penetrating micro-organisms rendering them harmless.

Warranty

5-year on electronic components

2-year on UV lamp

Electrical power ratings

120V/60Hz, 1 Amp

Caution

We recommend that the UV light equipment be installed by a licensed professional. For optimum performance, install in accordance with manufacturers instructions and safety guidelines, as well as national and local electrical codes.

Because keeping your air clean should be easy!

- *Easy to understand*
- *Easy to install*
- *Easy to maintain*
- *Easy on your wallet*

ELECTRO BREEZE
air cleaner ltd

DMUV Kit

Benefits:

- Improves indoor air quality providing a healthier environment
- Easy installation and can be retrofit to your existing equipment without the additional costs of modifications
- 80% Single pass deactivation rate of microbes
- 90% kill rate on multiple passes
- Filter efficiency is 97% efficient down to 0.3 microns
- Low pressure drop, giving you better energy savings
- 5-year manufacturers warranty on workmanship

The combination to kill and capture viruses, bacteria, mold spores and the particles that they ride on at 97% efficiency

UV Light

The Electro Breeze Duct Mount UV Kit combines the power of ultraviolet germicidal energy with the high efficiency electronic air cleaner panel

The Monitoring System will tell you when the UV lamp and Electronic air cleaner are connected. The lights will go out if something is not working properly.

Everything in one package working together to maintain your good indoor air quality

The Electro Breeze air cleaner claims of performance and effectiveness are backed by independent third party testing
